Stephen

I have received all of the validated data except for 3 data packages from the lab. I will forward the data packages to you and Mr. Carroll as soon as I send this and will send the last packages when I get them. The packages that I am sending do not contain all of the lab info, I can send you CDs with that when I receive all of the info if you want it.

Thanks

Brian W Mueller RPM

Subject: Barge Dock Area

Gary and Brian,

To facilitate Lazarus Energy getting a loan to finish the RI/FS and the Removal Action, Lazarus is requesting that the EPA consider removing or reclassifying the Barge Dock Area of the Falcon Refinery Superfund Site. We will be glad to prepare a technical justification to demonstrate that the Barge Dock Area has had no spills in the past and that conditions at the site do not pose a risk to human health and the environment. To enable us to present a case for reclassification we request that the EPA provide the analytical data that was obtained by the EPA or its consultant during 2013. TRC will compile all analytical data obtained from the Barge Dock area and prepare a report that compares the results to background, EPA MSSLS, TCEQ TRRP and Ecological values.

which may be a computer program. This attached computer program could
contain a computer virus which could cause harm to EPA's computers,
network, and data. The attachment has been deleted.

This was done to limit the distribution of computer viruses introduced
into the EPA network. EPA is deleting all computer program attachments
sent from the Internet into the agency via Email.

If the message sender is known and the attachment was legitimate, you
should contact the sender and request that they rename the file name
